This “housecleaning” task is necessary to insure that the water delivered to your home is the highest quality possible. While we are working in your area, you may experience some discolored water. Any discoloration can be cleared up by allowing your cold water to run for a short time. You may want to refrain from doing laundry from 7:00 am to 3:00 pm, Monday through Friday, when we are scheduled to be flushing in your area of town. Should the discoloration persist, please call our business office, and we will send our service personnel to assist you. 693-8188, Ext. 3.

The schedule listed above is an estimated schedule and may change by a few days before or after the listed dates. We thank you in advance for your cooperation, as we proceed with this important maintenance activity.
